

COMPOSITE PEEPSIGHT SURROUND

Delta Composite PeepSight Surrounds were designed for high duty service in cracking, olefins, and reformer units. The unique composition of a dense castable hot face and vacuum formed backup, creates a product that withstands extreme furnace conditions & has excellent thermal properties.

Noted features of a **Delta Composite PeepSight Surrounds** are:

- Lightweight / Self Supporting design requires no support angle
- Excellent thermal properties
- Protected alloy anchoring system
- Variable backup insulation thickness for all wall types
- Fast heat-ups with no holds
- 60% Alumina hot face resists erosion
- Suitable in all refractory and fiber linings

Typical Applications for **Delta Composite PeepSight Surrounds** are:

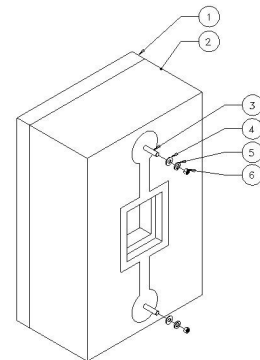

- Ethylene Units
- Catalytic Cracking Units
- Methane Reformers
- Hydrogen Reformers
- Olefins
- And more...

Available Sizes

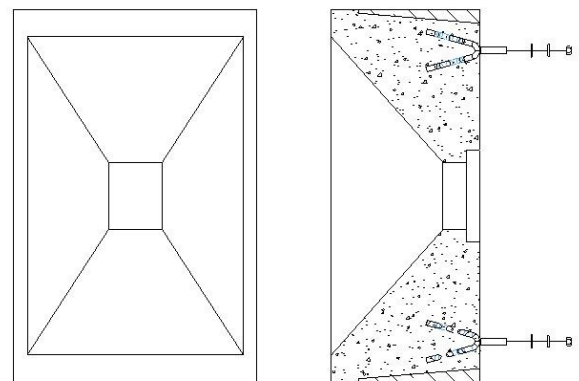

- Standard Size is 24" x 18" x 8" thick - w/ custom opening**
- Custom sized blocks are also available for a seamless installation.

* Delta also manufactures 100% precast burner blocks and composite burner tiles to suit all needs.

**Custom thicknesses and available.
